

Petition to Support Californians Right to Choose Independent Work & Freelance. Ask the Legislature to Suspend the Dynamex Court Decision and Determine a Better Way to Protect Workers & Reflect Today's Modern Workforce and save the rights of owner operator big rig truckers to be their own boss!

Truck Owner Operators among others are facing extinction because of the recent California Supreme Court decision known as Dynamex which could essentially harm the livelihoods of nearly two million Californians who choose to be an independent contractor or freelancer for full-time or part time work. The decision creates a one-size-fits-all that does not reflect today's realities of Californians who are choosing to work independently to make more money or for flexibility. We are asking the Legislature to suspend the court decision and allow time for a more reflective solution that protects workers as well as their freedom to choose to work independently. Save small business! By signing this you are telling lawmakers this can't become law and must be fixed! Each business must be allowed to make its own case and not be lumped with others!
